Pain 126 (2006) 327–331

PAIN

www.elsevier.com/locate/pain

Subject Index to Volume 126 (2006)

2-arachidonoylglycerol
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain **126**, 102
2-point discrimination
Spatial summation and spatial discrimination of pain sensation **126**, 123
5-HT3 Receptor
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia **126**, 54
Acupuncture
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study **126**, 245
Acute pain models
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Affect
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Algesiometry
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
Allodynia
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats **126**, 280
Alosetron
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia **126**, 54
Amino acid transmitters
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats **126**, 175
Amygdala
Brain responses to dynamic facial expressions of pain **126**, 309
Analgesia
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Analgesia
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Anandamide
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain **126**, 102
Anesthesia
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Anticipation
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Anxiety
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Anxiety
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Arthritis
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed **126**, 198
Bayesian statistics
Categories of placebo response in the absence of site-specific expectation of analgesia **126**, 115
Brain
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Breast biopsy
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Buprenorphine
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Cannabinoid 1 receptors
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain **126**, 102
Cannabinoid receptor
Spinal modulation of calcitonin gene-related peptide by endocannabinoids in the development of opioid physical dependence **126**, 256
Capsaicin
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study **126**, 35
Capsaicin receptor
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Catastrophizing
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Catastrophizing
Pain-related catastrophizing as a risk factor for suicidal ideation in chronic pain **126**, 272
Central sensitization
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184

doi:10.1016/S0304-3959(06)00619-1

CGRP
Spinal modulation of calcitonin gene-related peptide by endocannabinoids in the development of opioid physical dependence **126**, 256
Children
Genuine, suppressed and faked facial expressions of pain in children **126**, 64
Chronic pain
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Chronic pain
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats **126**, 280
CO_2 laser
Categories of placebo response in the absence of site-specific expectation of analgesia **126**, 115
Cognitive-behavioral risk factor
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72
Cohort study
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Conditioning
Categories of placebo response in the absence of site-specific expectation of analgesia **126**, 115
Coping
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed **126**, 198
Coping
Pain-related catastrophizing as a risk factor for suicidal ideation in chronic pain **126**, 272
Couples
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Daily diary
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed **126**, 198
Deception
Genuine, suppressed and faked facial expressions of pain in children **126**, 64
Dementia
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia **126**, 210
Depression
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Depression
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed **126**, 198
Dorsal anterior cingulate cortex
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Dose effectiveness
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Double-blind cross-over study
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Elderly residents
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia **126**, 210
Endocannabinoid system
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain **126**, 102
Endogenous pain inhibition
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Epidemiology
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Expectation
Categories of placebo response in the absence of site-specific expectation of analgesia **126**, 115
Face recognition
Brain responses to dynamic facial expressions of pain **126**, 309
Facial expression of pain
Brain responses to dynamic facial expressions of pain **126**, 309
Facial expressions
Genuine, suppressed and faked facial expressions of pain in children **126**, 64
FACS
Genuine, suppressed and faked facial expressions of pain in children **126**, 64
FACS
Brain responses to dynamic facial expressions of pain **126**, 309
Fear avoidance behaviour
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72
Fentanyl
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
fMRI
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study **126**, 35
Formalin test
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor $\alpha 3$ subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Functional magnetic resonance imaging
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Gabapentin
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Gene therapy
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain **126**, 294
Genetics
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
Glia
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain **126**, 294
Glycine
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor $\alpha 3$ subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46

Healthy volunteers
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Histamine
Bradykinin is a potent pruritogen in atopic dermatitis: A switch from pain to itch **126**, 16
History of depression
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed **126**, 198
Hyperalgesia
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Hyperalgesia
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats **126**, 280
Hypnosis
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Inflammation
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Inflammatory pain
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
In vivo electrophysiology
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Irritable bowel syndrome
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Item response theory
Pain assessment in profound cognitive impaired children using the Checklist Pain Behavior; is item reduction valid? **126**, 147
L5 spinal nerve ligation
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain **126**, 102
Local anesthetic-like action
Tramadol, fentanyl and sufentanil but not morphine block voltage-operated sodium channels **126**, 234
Low back pain
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Lumbar disc surgery
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72
Medical procedures
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Meta-analysis
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Microdialysis
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats **126**, 175
Mokken scaling model
Pain assessment in profound cognitive impaired children using the Checklist Pain Behavior; is item reduction valid? **126**, 147
Motivation
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Naked DNA
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain **126**, 294
Neck pain
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study **126**, 245
Neuropathic pain
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Neuropathic pain
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain **126**, 294
Nociception
Bradykinin is a potent pruritogen in atopic dermatitis: A switch from pain to itch **126**, 16
Nociception
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
Nociception
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study **126**, 35
Nociception
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Nociception
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Nursing homes
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia **126**, 210
Opioid withdrawal
Spinal modulation of calcitonin gene-related peptide by endocannabinoids in the development of opioid physical dependence **126**, 256
Opioids
Tramadol, fentanyl and sufentanil but not morphine block voltage-operated sodium channels **126**, 234
Pain
Genuine, suppressed and faked facial expressions of pain in children **126**, 64
Pain
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls **126**, 79
Pain
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Pain
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Pain
Pain-related catastrophizing as a risk factor for suicidal ideation in chronic pain **126**, 272

Pain assessment
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia **126**, 210
Pain behavior
Pain assessment in profound cognitive impaired children using the Checklist Pain Behavior; is item reduction valid? **126**, 147
Pain coping
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72
Pain modulation
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Pain perception
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Pain sensation
Spatial summation and spatial discrimination of pain sensation **126**, 123
Pain sensitivity
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Pain threshold
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Pain unpleasantness
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Peripheral neuropathy
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats **126**, 280
Persistent pain
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
PGE2
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Physical work load
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72
Placebo
Categories of placebo response in the absence of site-specific expectation of analgesia **126**, 115
Placebo
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study **126**, 245
Plasticity
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats **126**, 280
Postoperative
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Primary care
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Prognosis
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Prostaglandin E2
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Pruritus
Bradykinin is a potent pruritogen in atopic dermatitis: A switch from pain to itch **126**, 16
Psychometric
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia **126**, 210
QTL
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
R3 Reflex
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Randomised controlled study
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study **126**, 245
Rat
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study **126**, 35
Rats
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain **126**, 294
Regression to the mean
Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care **126**, 10
Self-hypnotic relaxation
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy **126**, 155
Sensitization
Bradykinin is a potent pruritogen in atopic dermatitis: A switch from pain to itch **126**, 16
Serotonin
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia **126**, 54
Sex difference
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
Sex differences
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats **126**, 175
Shock
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation **126**, 221
Social exclusion
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Social pain
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Social rejection
An experimental study of shared sensitivity to physical pain and social rejection **126**, 132
Sodium channels
Tramadol, fentanyl and sufentanil but not morphine block voltage-operated sodium channels **126**, 234
Somatic pain
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia **126**, 54
Spatial resolution
Spatial summation and spatial discrimination of pain sensation **126**, 123
Spatial summation
Spatial summation and spatial discrimination of pain sensation **126**, 123

Spinal cord
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection **126**, 46
Spinal cord
Spinal modulation of calcitonin gene-related peptide by endocannabinoids in the development of opioid physical dependence **126**, 256
Spouses
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress **126**, 139
Suicide
Pain-related catastrophizing as a risk factor for suicidal ideation in chronic pain **126**, 272
Surgery
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Systematic review
Gabapentin and postoperative pain – a systematic review of randomized controlled trials **126**, 91
Temporomandibular joint
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats **126**, 175
TENS
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study **126**, 245
Tester effects
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays **126**, 24
Thermal allodynia
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Thermal hyperalgesia
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Threat
Brain responses to dynamic facial expressions of pain **126**, 309
Tissue injury
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Transdermal opioid delivery system
Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine **126**, 165
Transgenic mice
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Transient receptor potential vanilloid 1
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Trigeminal subnucleus caudalis
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats **126**, 175
Vanilloid receptor
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Visceral hyperalgesia
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia **126**, 54
Voltage-operated
Tramadol, fentanyl and sufentanil but not morphine block voltage-operated sodium channels **126**, 234
VonFrey
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study **126**, 35
VR1
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse **126**, 184
Work-related risk factor
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors **126**, 72

Numbers 1–3 – 15 December 2006

EDITORIALS

What's in a Face: Can parents "read pain" in their children's faces?
L.K. Zeltzer, J.C.I. Tsao (USA) 1
Wedding hypnosis to the radiology suite
D. Spiegel (USA) 3

TOPICAL REVIEW

Voltage-gated calcium channels and pain
Y.-Q. Cao (USA) 5

RESEARCH PAPERS

Repeat assessment improves the prediction of prognosis in patients with low back pain in primary care
K.M. Dunn, P.R. Croft (UK) 10
Bradykinin is a potent pruritogen in atopic dermatitis: A switch from pain to itch
M. Hosogi, M. Schmelz, Y. Miyachi, A. Ikoma (Japan, Germany) 16
Screening for pain phenotypes: Analysis of three congenic mouse strains on a battery of nine nociceptive assays
J.S. Mogil, J. Ritchie, S.G. Sotocinal, S.B. Smith, S. Croteau, D.J. Levitin, A.K. Naumova (Canada) 24
Capsaicin-evoked brain activation and central sensitization in anaesthetised rats: A functional magnetic resonance imaging study
R.J. Moylan Governo, P.G. Morris, M.J.W. Prior, C.A. Marsden, V. Chapman (UK) 35
Spinal prostaglandin E receptors of the EP2 subtype and the glycine receptor α3 subunit, which mediate central inflammatory hyperalgesia, do not contribute to pain after peripheral nerve injury or formalin injection
K. Hösl, H. Reinold, R.J. Harvey, U. Müller, S. Narumiya, H.U. Zeilhofer (Germany, UK, Japan, Switzerland) 46
Effects of the 5-HT3 receptor antagonist, alosetron, in a rat model of somatic and visceral hyperalgesia
A. Miranda, S. Peles, P.G. McLean, J.N. Sengupta (USA, UK) 54
Genuine, suppressed and faked facial expressions of pain in children
A.-C. Larochette, C.T. Chambers, K.D. Craig (Canada) 64
Reduced work capacity after lumbar disc surgery: The role of cognitive-behavioral and work-related risk factors
J.J. den Boer, R.A.B. Oostendorp, T. Beems, M. Munneke, A.W.M. Evers (The Netherlands) 72
Cortical effects of anticipation and endogenous modulation of visceral pain assessed by functional brain MRI in irritable bowel syndrome patients and healthy controls
G.H. Song, V. Venkatraman, K.Y. Ho, M.W.L. Chee, K.G. Yeoh, C.H. Wilder-Smith (Singapore, Switzerland) 79
Gabapentin and postoperative pain – a systematic review of randomized controlled trials
K.-Y. Ho, T.J. Gan, A.S. Habib (USA) 91
Site-specific increases in peripheral cannabinoid receptors and their endogenous ligands in a model of neuropathic pain
S. Mitrirattanakul, N. Ramakul, A.V. Guerrero, Y. Matsuka, T. Ono, H. Iwase, K. Mackie, K.F. Faull, I. Spigelman (USA) 102
Categories of placebo response in the absence of site-specific expectation of analgesia
A. Watson, W. El-Deredy, D.E. Bentley, B.A. Vogt, A.K.P. Jones (UK, USA) 115
Spatial summation and spatial discrimination of pain sensation
R. Defrin, R. Givon, N. Raz, G. Urca (Israel) 123
An experimental study of shared sensitivity to physical pain and social rejection
N.I. Eisenberger, J.M. Jarcho, M.D. Lieberman, B.D. Naliboff (USA) 132
Pain affects spouses too: Personal experience with pain and catastrophizing as correlates of spouse distress
M.T. Leonard, A. Cano (USA) 139
Pain assessment in profound cognitive impaired children using the Checklist Pain Behavior; is item reduction valid?
H.J. Duivenvoorden, D. Tibboel, H.M. Koot, M. van Dijk, J.W.B. Peters (The Netherlands) 147
Adjunctive self-hypnotic relaxation for outpatient medical procedures: A prospective randomized trial with women undergoing large core breast biopsy
E.V. Lang, K.S. Berbaum, S. Faintuch, O. Hatsiopoulou, N. Halsey, X. Li, M.L. Berbaum, E. Laser, J. Baum (USA) 155

doi:10.1016/S0304-3959(06)00620-8

Differential sensitivity of three experimental pain models in detecting the analgesic effects of transdermal fentanyl and buprenorphine
M. Koltzenburg, R. Pokorny, U.E. Gasser, U. Richarz (UK, Switzerland) 165
Amino acid release at the spinomedullary junction after inflammation of the TMJ region in male and female rats
D.A. Bereiter, A.P. Benetti (USA) 175
Differential contribution of TRPV1 to thermal responses and tissue injury-induced sensitization of dorsal horn neurons in laminae I and V in the mouse
W.A. Eckert, D. Julius, A.I. Basbaum (USA) 184
Coping with rheumatoid arthritis pain in daily life: Within-person analyses reveal hidden vulnerability for the formerly depressed
T.S. Conner, H. Tennen, A.J. Zautra, G. Affleck, S. Armeli, J. Fifield (USA) 198
The psychometric quality and clinical usefulness of three pain assessment tools for elderly people with dementia
S.M.G. Zwakhalen, J.P.H. Hamers, M.P.F. Berger (The Netherlands) 210
Emotional modulation of spinal nociception and pain: The impact of predictable noxious stimulation
J.L. Rhudy, A.E. Williams, K.M. McCabe, P.L. Rambo, J.L. Russell (USA) 221
Tramadol, fentanyl and sufentanil but not morphine block voltage-operated sodium channels
G. Haeseler, N. Foadi, J. Ahrens, R. Dengler, H. Hecker, M. Leuwer (Germany, UK) 234
Efficacy and safety of acupuncture for chronic uncomplicated neck pain: A randomised controlled study
J. Vas, E. Perea-Milla, C. Méndez, C. Sánchez Navarro, J.M. León Rubio, M. Brioso, I. García Obrero (Spain) 245
Spinal modulation of calcitonin gene-related peptide by endocannabinoids in the development of opioid physical dependence
T. Trang, W. Ma, J.-G. Chabot, R. Quirion, K. Jhamandas (Canada) 256
Pain-related catastrophizing as a risk factor for suicidal ideation in chronic pain
R.R. Edwards, M.T. Smith, I. Kudel, J. Haythornthwaite (USA) 272
Spinal pathways involved in supraspinal modulation of neuropathic manifestations in rats
N.E. Saadé, H. Al Amin, S. Chalouhi, S. Abdel Baki, S.J. Jabbur, S.F. Atweh (Lebanon) 280
Repeated intrathecal injections of plasmid DNA encoding interleukin-10 produce prolonged reversal of neuropathic pain
E.D. Milligan, E.M. Sloane, S.J. Langer, T.S. Hughes, B.M. Jekich, M.G. Frank, J.H. Mahoney, L.H. Levkoff, S.F. Maier, P.E. Cruz, T.R. Flotte, K.W. Johnson, M.M. Mahoney, R.A. Chavez, L.A. Leinwand, L.R. Watkins (USA) 294
Brain responses to dynamic facial expressions of pain
D. Simon, K.D. Craig, W.H.R. Miltner, P. Rainville (Germany, Canada) 309

LETTERS TO THE EDITORS

Model validation and structural equation modeling: A reply to Ward and Thorn
A.J. Cook, K.E. Vowles, P.A. Brawer (USA, UK) 319
Pain activates cortical areas in the preterm newborn brain
D. Bowsher (UK) 320
Response to David Bowsher's comment: The hump from cerebral neurovascular events to the subjective feeling of pain in neonates
M. Bartocci, K.J.S. Anand, H. Lagercrantz (Sweden) 321
Endothelin antagonists in CION injury model
R.B. Raffa, H.I. Jacoby (USA) 322
Response to Dr. Raffa's and Dr. Jacoby's Letter to the Editor regarding our study on endothelin antagonists in CION injury model. Pain 2006;123:64–74
G.A. Rae, J.G. Chichorro, A.R. Zampronio, G.E.P. Souza (Brazil) 322
